

Smart Learning & Open Access

25/05/2018

I was pleased to take part in a webinar for the Smart Learning Institute at Normal University in Beijing, China. Due to time difference I suggested I do a video-cast and they were happy to oblige with that, so I created a presentation of slides with audio for them to use. The video is shared above. The presentation was part of their 2nd Belt and Road 'Innovation, Design and Learning Webinars, 21-25 March 2018'.

The information about the series of webinars and conference speakers is here:
<http://sli.bnu.edu.cn/en/News/2018/0315/516.html>

The topic was how Smart Learning benefits from open access knowledge, illustrating how and why this happens. I enjoyed making the presentation so hope others got something out of it. It has helped in focus for the thesis as distinguished clearly between ad-hoc open smart learning, and what enterprise infrastructure smart city learning might be.

The slides are available at <https://speakerdeck.com/penworks/smart-learning-and-open-access>
