

Trxtr At the Signal Gallery

07/09/2013

Trxtr did a great show early in 2013, called Dystopia, and I went along to take photographs and make a video of what happened. Here's the video, and there's a photo gallery here too. I use a Panasonic GF3, shoot HD 1080p AVCHD and use hi res jpg stills. I always use iMovie to edit these days, it's just no mess no fuss. Music here is from SCSI-9 (from their album Metamorphosis), a great Russian ambient techno duo, who are also DJs.
